Patent Grant Details

COUNTRY:	Australia
APPLICATION TYPE:	Complete / PCT national phase
TITLE:	Cable lockout assembly
APPLICATION NO:	2017380680
PATENT NO:	2017380680
PATENTEE:	Loto Safety Products DMCC
APPLICATION DATE:	11 July 2017
PRIORITY DETAILS:	India (IN) 201641043505 20 Dec 2016
PATENT ISSUE DATE:	12 November 2020
PATENT EXPIRY DATE:	11 July 2037
NEXT RENEWAL DUE:	11 July 2021

Renewal fees for this patent become payable from the fourth anniversary.

TERM

The term of this patent is 20 years from the date of application.

RENEWAL

In order to keep the patent in force it is necessary to pay annual renewal fees. The next renewal fee due date is provided above. If this date has already passed, or is in the near future, you should have received a reminder from CPA Global.

Our standard procedure is to refer our cases to CPA Global (CPA), a specialist renewals payment firm that pays renewal fees on behalf of our clients. CPA will send renewal reminder notices to you and attend to renewal upon receipt of your instructions.

Please let us know if can assist you with your dealings with CPA.

FB Rice receives a financial benefit from CPA.

PUBLICATION DATE

Please note that the Publication Date on the cover page of the patent specification may differ from the International Publication Date on the PCT Pamphlet. The Publication Date is the date the PCT Pamphlet was made open to public inspection by IP Australia. The Accepted Journal Date is the date that acceptance of the application was advertised by IP Australia.

COMPULSORY LICENCES – WORKING REQUIREMENTS

No evidence of working is required unless a third party applies for a compulsory licence. A compulsory licence is available if the reasonable requirements of the public in relation to the invention have not been met within three years from patent grant. Third parties may also seek revocation of the patent if the public's requirements are still not met within two years of the grant of a compulsory licence. In practice, however, these provisions are generally regarded as ineffectual as no compulsory licences have been granted and no patents revoked on these grounds.

WARNING

The details of this patent are publicly available. As such, it is possible you will receive correspondence from organisations offering to publish details of the patent or other services on payment of fees. We recommend against accepting these offers.
